RECENT BOOKS PUBLISHED BY AAPP MEMBERS

Simon A. Brooks has published a book entitled [Psychiatry Declining: Myths, Neuroscience and The Loss of Self](#). (2020, Friesen Press).

People suffering from mental illnesses are among the most vulnerable of our society's unfortunates. They deserve our support and care. While the clinical care they receive from front-line psychiatrists and other clinicians is generally good in the Western world, better understanding of mental illness is desperately needed. Every year or so sees new diagnoses added to the list of mental disorders, each with cohorts of new patients. Every year or so sees new estimates-ever swelling-of the number of those suffering from mental illness. But does this demonstrate progress?

Peter Zachar has co-edited a book: Kendler, Kenneth S. Parnas, Josef & Zachar. Peter (Eds.) (2020). *Levels of Analysis in Psychopathology: Cross-Disciplinary Perspectives*. Cambridge: Cambridge University Press.

Levels of Analysis in Psychopathology draws research from psychiatry, philosophy, and psychology to explore the variety of explanatory approaches for understanding the nature of psychiatric disorders both in practice and research. The fields of psychiatry and clinical psychology incorporates many useful explanatory approaches and this book integrates this range of perspectives and makes suggestions about how to advance etiologic theories, classification, and treatment. The editors have brought together leading thinkers who have been widely published and are well-respected in their area of expertise, including several developers of the Diagnostic and Statistical Manual of Mental Disorders and authors of the US National Institute of Mental Health's Research Domain Criteria Project (RDoC). Each main chapter has a commentary provided by one of the other authors and an introduction written by one of the editors to create an accessible, interdisciplinary dialog.
